

Theo Platform

Smart Commerce & Community Platform for Cambodia

Vision

Theo Platform is an all-in-one digital platform designed specifically for Cambodia. It combines a commercial marketplace for affordable second-hand electronics with free community tools that help people improve their employment opportunities.

Unlike a traditional e-commerce website, Theo Platform is built as a modular platform where every feature shares the same authentication system, user database, design language, and infrastructure.

The long-term objective is to create a sustainable ecosystem where revenue generated from the electronics marketplace helps fund free educational and career resources for Cambodian people.

Mission

Our mission is to make technology more accessible and career development easier for everyone in Cambodia.

We believe that affordable computers and free career tools can create meaningful opportunities for students, job seekers, freelancers, and professionals.

Core Principles

- Community First
 - Affordable Technology
 - Open Source
 - Transparency
 - Accessibility
 - Mobile First
 - AI Assisted
 - Privacy Focused
 - Khmer & English Support
-

Platform Overview

Theo Platform consists of two major sections.

Commercial Platform

A complete marketplace for second-hand electronics.

Modules include:

- Second-Hand Laptop Store
- Gaming PC Marketplace
- PC Components
- Accessories
- Warranty Management
- Repair Requests
- Order Management
- Customer Accounts
- Inventory Management

Revenue generated from this section supports platform development and free community services.

Community Platform

Community resources are completely free.

Modules include:

- Resume Builder
- Resume Templates
- Career Guides
- Interview Preparation
- AI Resume Assistant
- Khmer-English Writing Assistance
- Job Application Resources

No subscription is required for these resources.

Target Audience

Primary users include:

- Cambodian students
- First-time job seekers
- Office workers
- IT professionals
- Gamers
- Small businesses
- Computer enthusiasts
- Freelancers
- NGOs

- Educational institutions
-

Shop Module

Purpose

Provide affordable, trusted second-hand electronics for Cambodian customers.

Products

- Gaming PCs
- Business Laptops
- Desktop Computers
- Graphics Cards
- CPUs
- RAM
- SSDs
- HDDs
- Mechanical Keyboards
- Gaming Mice
- Monitors
- Networking Equipment
- Accessories

Each product contains:

- Product Images
- Technical Specifications

- Product Condition
- Cosmetic Rating
- Functional Rating
- Purchase Date
- Warranty Information
- Serial Number
- Stock Status
- Product Description
- Delivery Information

Features

- Smart Search
 - Product Filtering
 - Categories
 - Wishlist
 - Shopping Cart
 - Order History
 - Customer Reviews
 - Recently Viewed Products
 - Product Comparison
 - QR Code Identification
-

Inventory Management

Internal business management system.

Functions

- Product Registration
 - Barcode Generation
 - QR Code Generation
 - Shelf Management
 - Purchase Tracking
 - Supplier Tracking
 - Inventory Reports
 - Profit Calculation
 - Product Lifecycle Tracking
 - Repair Status Tracking
-

Warranty Management

Customers can verify warranty status online.

Functions

- Warranty Lookup

- Serial Number Search
 - Warranty Expiration
 - Repair History
 - Warranty Claim Request
-

Resume Builder

Purpose

Provide completely free resume creation tools for Cambodian job seekers.

Features

- Multiple Resume Templates
- Khmer Language
- English Language
- ATS Friendly Layouts
- PDF Export
- Photo Upload
- QR Code
- AI Writing Assistance
- Resume Preview
- Resume Sharing

Resume Sections

- Personal Information
- Education
- Work Experience
- Skills
- Certifications
- Languages
- Projects
- References

Future improvements

- AI Resume Review
 - AI Grammar Correction
 - Resume Score
 - Interview Suggestions
-

Community Resources

Additional free resources.

Includes

- Interview Tips
 - Career Guides
 - Resume Examples
 - Job Search Advice
 - Computer Literacy Guides
 - Workplace Communication
 - Productivity Tips
-

User Dashboard

Every registered user receives a personal dashboard.

Users can

- Manage Profile
 - View Orders
 - Download Resumes
 - Save Favourite Products
 - Track Warranty
 - Manage Notifications
 - Update Personal Information
-

Admin Dashboard

Central management system.

Modules

- Dashboard
 - Users
 - Products
 - Categories
 - Inventory
 - Orders
 - Warranty
 - Community Content
 - Resume Templates
 - Reports
 - Settings
 - Audit Logs
-

AI Features

Future AI capabilities include:

Commerce

- Product Description Generation
- Product Translation
- Customer Support Assistant
- Smart Product Recommendations

Community

- Resume Writing
- Grammar Improvement
- Translation
- Cover Letter Generation
- Interview Practice

Administration

- Sales Forecasting
 - Inventory Prediction
 - Customer Analytics
-

Technical Architecture

Frontend

- Next.js
- React
- Tailwind CSS
- shadcn/ui

Backend

- NestJS
- REST API

Database

- PostgreSQL

ORM

- Prisma

Authentication

- Auth.js

Storage

- MinIO

Search

- Meilisearch

Caching

- Redis

Automation

- n8n

Monitoring

- Uptime Kuma
- Grafana
- Prometheus
- Loki

Analytics

- Umami

Containerization

- Docker
- Docker Compose

Reverse Proxy

- Nginx

Operating System

- Ubuntu Server

Source Control

- Git
- GitHub

Deployment

- Self-hosted server

Security

The platform will implement:

- HTTPS Encryption
 - Secure Authentication
 - Role-Based Access Control
 - Rate Limiting
 - Audit Logging
 - Daily Backups
 - Encrypted Password Storage
 - Firewall Protection
 - File Validation
 - Session Management
-

Long-Term Vision

Theo Platform aims to become one of Cambodia's most trusted technology and community platforms.

By combining affordable second-hand electronics with free career development tools, the platform creates a sustainable ecosystem where commercial success directly supports community impact.

The project is designed with scalability in mind so that future modules—such as repair booking, learning resources, certification tracking, internship opportunities, and additional public services—can be integrated without changing the core architecture.

Every component shares one secure account system, one database, one administration panel, and one consistent user experience, allowing the platform to grow while remaining easy to maintain.
